Jessica- please call me today to discuss the meeting logistics (ie location, laptop connection to overhead, etc). We may have about a dozen staff but expect key staff to attend and the room will be full. Bring 15 hard copy color presentations in case of overhead issues.

The call in number for overseas is [Ex. 6 Personal Privacy (PP)] then enter conference code [Ex. 6 Personal Privacy (PP)]
The call in number for domestic US is [Ex. 6 Personal Privacy (PP)] then enter conference code [Ex. 6 Personal Privacy (PP)]

Many Thanks,
Tony Kish

Hello Tony,

The changes to the presentation are minor. I added a participant (via phone) to the agenda. I removed a slide that was intended for background on chlormequat chloride because of our limited time. I rearranged the slides (I put the residue trial slides before the end-use product slides) because my team felt it flowed better. I elaborated on the slides for Environmental Fate. No information was removed, I just went into a bit more detail. None of the content was changed throughout the entire presentation.

Regarding the conference line, I apologize. This is the first time I have had to set up the actual meeting with EPA. I didn't realize I had to specify I needed a conference call-in line. We do have several colleagues that need to call into the meeting. I thought I had mentioned before, they are located in Belgium and are unable to travel to the US for our meeting. We use skype for business and I can set up a meeting with them to call into using skype for business. I would just need a phone system that has speaker phone capability and I would also need to be able to get onto the internet. If this sounds too complicated, this is fine and we can use a standard call-in phone number. If you prefer this, can you send me the phone number ahead of time so they know how to call into the meeting?

I appreciate all your help.

Thank you,
Jessica McLaughlin

Jessica- What is different about these slides (ie. major or minor)? I did not set up and you did not request a conference line for call-ins- do we need one or did you set one up? We will pass around a sign-in sheet at meeting and give it to you to create the meeting minutes. I don't know anything about skype but if there is a conference line just send them the slides prior and they can follow along.

Many Thanks,
Tony Kish

Hello Tony,

Thank you for the information.

I have attached an updated version of our slide deck that we plan to present on Thursday. Can you provide me with a list of people who will be attending the meeting from EPA?

Also, if possible, I'd like to set up the meeting through our skype meeting webpage. This way the people who will be calling in from Eastman/Taminco will be able to view the slides as they are presented during the meeting. Do you foresee any issue with this? It should be pretty easy. As long as there is a conference phone, it should be fine.

I look forward to meeting you and your team.

Thank you,
Jessica McLaughlin

Hello Tony,

Can you tell me where the meeting on Thursday (7/14/2016) at 11 am will be held? Where is a good place to have my colleagues meet before the meeting?

I appreciate any information.

Thanks,
Jessica McLaughlin

Hello Tony,

I have attached the presentation we intend to present to EPA on July 14, 2016 . This presentation gives your team a general overview of chlormequat chloride, it explains our regulatory intent in regards to the active ingredient, and it outlines specific questions/comments we have regarding data requirements to obtain a Section 3 Registration. I have also attached the handout we will be passing out during the meeting. This is a summary of all the data we intend to fulfill and how we plan to meet the requirements. I hope this is what you were expecting to see from us. If you have any questions please let me know. Otherwise, I look forward to meeting with you on July 14 at 11:00 am. Have a good holiday weekend.

Regards,
Jessica McLaughlin

Hello Tony,

Sorry I missed your phone call. I spoke with my team and we would like to schedule a meeting for the morning of Thursday, 7/14. Please let me know if this is still available.

Thanks,
Jessica

Subject: FW: Eastman/Taminco Pre-Submission Meeting for Chlormequat Chloride on Wheat, Oats, and Barley

Hello Mr. Kish,

I want to follow up with you regarding a potential pre-submission meeting of chlormequat chloride. Have you had the opportunity to look at your schedule and decide if either July 12, July 15, or another date all together would work?

Thank you,
Jessica McLaughlin

Subject: Eastman/Taminco Pre-Submission Meeting for Chlormequat Chloride on Wheat, Oats, and Barley

Hello Mr. Kish,

I want thank you for speaking with me yesterday. This email is a follow up to our conversation. Eastman/Taminco would like to have a pre-submission meeting with EPA to discuss the data requirements for obtaining a FIFRA section 3 end-use product registration that will contain chlormequat chloride for use on wheat, barley, and oats. The dates we are proposing are July 12, 2016 or July 15, 2016. We would prefer to have the meeting in the morning hours because we have colleagues located in Belgium that would like to call into the meeting. We previously met with EPA on March 10, 2015 to discuss both an import tolerance petition and a FIFRA section 3 application for chlormequat chloride. However, due to time limitations the focus of the meeting was solely on the import tolerance. We are moving forward with this action and plan to have the import tolerance petition for chlormequat chloride on wheat, barley, and oats submitted to EPA by SciReg within the coming weeks. I will work with my team to compile all of the information we plan to present and send it to you at least two weeks before our scheduled meeting. Please let me know if you need any additional information from me. I look forward to hearing from you.

Regards,
Jessica McLaughlin
